

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

1-5. (Cancelled).

6. (Currently Amended) A process for reducing NO_x emissions in a gaseous combustion effluent stream containing oxides of nitrogen NO and NO₂ and ~~converting the oxides to nitric acid~~ for producing a potassium nitrate fertilizer as a byproduct comprising the steps of:

a) adding hydrogen peroxide in aerosol form to the effluent stream in sufficient amounts to generate nitric acid by first stage reactions as follows:

b) adding sufficient potassium hydroxide in particulate form to the stream to ~~generate the~~ potassium nitrate fertilizer in second stage reactions as follows:

7. (Original) The process of claim 6 wherein NO_x emissions are reduced to a level below 40 ppm.

8. (Currently Amended) A process for reducing NO_x emissions in a gaseous combustion effluent stream from a land-based gas turbine containing oxides of nitrogen NO and NO₂ and ~~converting the oxides to nitric acid~~ for producing a potassium nitrate fertilizer as a byproduct comprising the steps of:

a) adding hydrogen peroxide to the effluent stream in sufficient amounts to generate nitric acid by first stage reactions as follows:

b) adding sufficient potassium hydroxide to the stream to ~~generate~~ the potassium nitrate fertilizer in second stage reactions as follows:

9. (Original) The process of claim 8 wherein the hydrogen peroxide is added in aerosol form.

10. (Original) The process of claim 8 wherein the potassium hydroxide is added in particulate form.

11. (Original) The process of claim 8 wherein NO_x emissions are reduced to a level below 40 ppm.
